## One Tough Knight

Alinco Costumes worked closely with Fairleigh Dickenson University to create a mascot costume based on their logo of a knight chess piece.

Horse heads are one of the most difficult masks to create while still providing the performer with good vision and mobility. However, Alinco's skilled artists and designers rose to the challenge. The horse head was fully sculpted, poured in latex, and painted. A head set and chin strap were fixed inside the mask to stabilize it and allow the performer to move freely. Special care was taken to keep the mask balanced and as light as possible.

With the addition of a complete muscle suit and accessories, this knight is sure to catch the attention of large audiences.

*Costume design by Kevin Wasden, Sculpture by Dan Mortenson, Head construction by Lu Smith, Body construction by Pat Cook and Mohamed Shariff-Khahf Mudhir*
