

Arkansas Twisters - "Radar"

Look what the wind blew in.

Arena Football 2's Arkansas Twisters wanted a unique fantasy character that would appeal to a wide audience. Pieced together from a number of preliminary sketches, Radar began to take shape.

Specialty furs were manufactured by National Fiber Technologies and pieced together to give Radar his calico appearance.

In spite of his apparent bulk, Radar is quite mobile. With the use of a modified harness he can even rappel from the rafters.

Radar's fame in Arkansas has grown quickly. In fact, he was invited to appear in the Miss Arkansas Pageant.

Costume design by Kevin Wasden. Head construction by Karen Lefohn. Body construction by Pat Cook.
